

BLAME IT ON THE TEACHER?

- ❖ You have been assigned to review the grades of a certain student. Specifically, you have been asked to review the scores she received on essays written for Social Studies in 9th, 10th and 11th. The scores thus far are:
- 99, 97, 100 and 99 (9th Grade World History)
 - 96, 94, 99 and 100 (10th Grade World History)
 - 65, 60 (US History)

In a recent move to better evaluate learning, cameras have been placed in 11th grade classrooms, including the social studies class of the student whose essay grades you are reviewing. As an investigator, you have reviewed one tape that alarms you regarding the student's 11th grade Social Studies Teacher. Using the data noted above and the video, write a memo that highlights your findings. In other words, try to explain the wild variance in her scores from 9th and 10th grade to 11th grade.
